Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

I am speaking out against Comcast's proposal to charging different rates for different services and companies for using their Internet pipelines. This is an wholly unfair, uncompetitive, and un-American practice that should never be put into place. Imagine if this was done to toll roads. Hondas and Nissans do not pay tolls, but Mitsubishis would. People would come out against any sort of policy of this matter immediately. However, a large amount of the American people are not as tech savvy and Comcast is, in my opinion, clearly hoping for that to get this and similar, more restrictive resolutions passed. This is the first step to silencing the American public on the Internet and I hope that it will never come to pass. If it does, well, at least I am very close to the land of the free - Canada. Sincerely, Robert N. Adams

"The man who never looks into a newspaper is better informed than he who reads them; inasmuch as he who knows nothing is nearer to truth than he whose mind is filled with falsehoods and errors." -- Thomas Jefferson "Unless you become more watchful in your States and check this spirit of monopoly and thirst for exclusive privileges you will in the end find that the most important powers of Government have been given or bartered away, and the control of your dearest interests have been passed into the hands of these corporations." -- President Andrew Jackson, Farewell Address, March 4, 1837 (2) "The liberty of a democracy is not safe if the people tolerate the growth of private power to a point where it becomes stronger than their democratic State itself. That, in its essence, is Fascism--ownership of government by an individual, by a group, or any controlling private power." -- President Franklin D. Roosevelt (76) "We are not afraid to entrust the American people with unpleasant facts, foreign ideas, alien philosophies, and competitive values. For a nation that is afraid to let its people judge the truth and falsehood in an open market is a nation that is afraid of its people." -- John F. Kennedy "The lie can be maintained only for such time as the State can shield the people from the political, economic and/or military consequences of the lie. It thus becomes vitally important for the State to use all of its powers to repress dissent, for the truth is the mortal enemy of the lie, and thus by extension, the truth becomes the greatest enemy of the State."

Pittsgrove, NJ 08318

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Valerie Blanchard

Pittsgrove, NJ 08318

Being a Comcast customer I can testify firsthand to their dirty tactics. They are a nasty company that has a stranglehold on many areas - mine for one. If there was a way I could not give them even a cent of my hard earned money I would do so in an instant! They have the local area sports tied up with Comcast SportsNet channel and refuse to give rights to

any other broadcasting company to show their local Comcast sport channel. So if you sign up say with a satellite company you can get Comcast Sports Channel for every other area save the area you live in. As for internet service they are the only ones in many areas - again like mine - that supply high speed internet. We can not get DSL here, there are no other cable internet suppliers in the area and satellite internet is much more expensive while not being as fast. To top it off if you do not have Comcast cable TV service they charge a whopping \$15 more a month for internet service. This company has proven time and again that they are not above any dirty tactics. They know they have us by the throats and aren't afraid to squeeze. Please do not allow them to pummel us further.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Hoboken, NJ 07030

The big media corporations have monopolized and exploited the public media long enough. We can't even have elections anymore without them determining who we will see and whose voice we will hear. It is time for the FCC to

stand up for the people against the special interest groups who dominate our public media and operate them for profit but often against the public interest. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

frank delboccio
35 pleasant avenue
montclair, NJ 07042

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. This action by Comcast is beyond contempt. It sickens me and debases our democracy. Soon all that will be left of our forefathers' dreams and actions will be frauds and lies. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Randy DeLeo
14 Guenter Street
Butler, NJ 07405

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. Inserting individuals in a public forum to take up seats and thus not allowing space for those who wish to protest control of the internet is appalling and reprehensible. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Control and censorship are NOT PERMISSIBLE, regardless of Comcast's political ties.

Mariano Delgado
1144 Thornton Ave
Plainfield, NJ 07060

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Chad Dell
121 Woodland Ave
Neptune, NJ 07753

I'm writing to express concern about Comcast's blatant and deceptive blocking of peer-to-peer communications. This is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. I urge the FCC to take serious and immediate action to put an end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. I believe the Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Thank you.

Alexandria Delman
222 Saint James Ave.
Merchantville, NJ 08109

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of

discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I am sickened at how "big business" controls Americans' lives, from the food we eat to the Internet to mortgages, to gas--please work for the people.

Pierre Demassey
746 Estates Ave
Mercerville, NJ 08619

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. The Internet became the force that it is today because it was founded on the principles of openness, democracy, and freedom. The only way to preserve the greatest collective achievement of mankind is to remember that and act in the interest of everyone, whether or not it turns a corporation a buck.

Ronn Friedlander
50 Fairfield Ave.
Cranford, NJ 07016

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. The success of the internet lies in the ability of any single person to create, provide or view opinions, creative expressions and information. If the neutrality of the internet is not upheld, our nation, nay, the world will have made a large step backward. I can conceive of no justification for failing to preserve the openness and availability of the internet and I view any attempts to restrict it as an assault on our freedom and constitutional rights to free speech and assembly. I am aware that in Myanmar, home to a ruthless military dictatorship, restriction of the internet is a common practice. I sincerely hope that we do not have to join their ranks.

Newfoundland, NJ 07435

Net neutrality (end-to-end principle) is a text book part of the TCP/IP protocol. No net neutrality, no Internet. It would be something else, a computer network, but not Internet. Comcast already has a tool to use to chase bandwidth hogs: Charge by bandwidth consumed. I believe the real reason Comcast wants to block peer-to-peer file sharing is because it impinges on their cable business, even when legally used. It's not about privacy or speeds for other people, it's about breaking the Internet to protect a business model. Please vote for free markets by ensuring that Comcast can't break the Internet.

There are many compelling reasons to restore and enforce net neutrality. One reason is to ensure privacy of our communications (absent a court warrant issued after due process). The Attorney General for Connecticut puts it well: Connecticut Attorney General's Office Press Release Attorney General Denounces Comcast For Spying On Its Internet Customers February 13, 2002 Attorney General Richard Blumenthal announced today that he was opening an investigation into the electronic tracking of customer activities by the cable Internet service of Comcast Corporation. Published reports indicate that Comcast has recently begun to keep individualized records of the internet sites visited by subscribers to its internet services, and even, in some instances, to keep records of customers' credit card numbers and passwords they use for other sites. "Comcast needs to remove its electronic eyes from subscribers' homes and its electronic tentacles from their wallets. Apparently this company thinks it can get away with spying on its own customers, because no one will notice, and because there's so little competition for high speed cable internet access," Blumenthal said. "We will act quickly to investigate the legality of Comcast's actions, and especially the adequacy of any notice that Comcast gave its customers about its spying on them." While the investigation proceeds, Blumenthal urged consumers to tell Comcast, by email and by telephone, what they think of the company's new policy. "Comcast's comment in the middle of a buried web page is certainly not fair and adequate notice that a basic utility will be spying on consumers for its own purposes," he added. "Unfortunately, the more we use modern technology, the more vigilant we must be against threats to personal privacy as the price for access." Content Last Modified on 6/17/2005 10:57:06 AM

I read in the news that Comcast or someone who really, really likes Comcast evidently bribed in its own crowd to a FCC public hearing on a open Internet, These seat-warmers, were paid to fill the room, a move that kept others from taking part. They arrived en masse some 90 minutes before the hearing began and occupied almost every available seat, upon which many promptly fell asleep. One told the news that he was "just getting paid to hold someone's seat." Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Maksymilian Gorski
7 bensonhurst ave
Fords, NJ 08863

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Julian Kernes
333 W. State St., 11-K
Trenton, NJ 08618

It is bad enough that network TV is block us from hearing candidates for President because they didn't do well in 2 states. It is a violation of free speech. To block information to We, the People of the United States on the Internet would be another violation of the Constitution for which this Nations laws were founded on to go up against the new King Georges of the world who would keep us in ignorance in ordered to maintain dominant rule not thinking of the future of an informed and educated populace expressing innovative ideas and debating the validity of current policies and informing and showing us of diverse cultural activities that aren't all about who can horde the most money making other people live miserably. You can't take the money with you when you die. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Julian Kernes
333 W. State St., 11-K
Trenton, NJ 08618

It is bad enough that network TV is block us from hearing all candidates run for President because they didn't do well in 2 of the 50 states. It is a violation of free speech. To block information to We, the People of the United States on the Internet would be another violation of the Constitution for which this Nations laws were founded on to go up against the new King Georges of the world who would keep us in ignorance in ordered to maintain dominant rule of the narrow minded and not thinking of the future of an informed and educated populace expressing innovative ideas and debating the validity of current policies and informing and showing us diverse cultures. For example, I recently learn that our form of Democracy didn't come exclusively from the Greeks, but also from the Iroquoi tribal form of council

governing, a culture diverse from Europe. It's not all about who can hoard the most money while making other people live miserably. You can't take the money with you when you die. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Princeton, NJ 08540

Comcast has recently blocked certain peer-to-peer communications to serve its own concept of efficiency. Net Neutrality protections are needed to prevent this type of behavior. The FCC must act immediately to end this practice and prevent other Internet service providers from following Comcast and chilling the free flow of online information. The Internet is vital to economic growth, civic participation and free speech. Internet technology was developed with public funding, and it is a public trust. Corporate gatekeepers should not be allowed to smother this new entirely democratic form of communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Malcolm Lowry
201 saint paul's ave. #16V
jersey city, NJ 07306

Something must be done to keep the internet free. If you believe in the ideals of democracy the internet is the last vestige of free speech and open communication. Lets not turn it into another one-way communication medium like television. Make an example out of comcast. Punish them severely. Fine them 20 million dollars, or give away a portion/district of their cable business to a new entrant! Please do the right thing, I have faith in you FCC. Dont make me lose this faith! Thankyou for your time. -Malcolm ----- Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Princeton, NJ 08540

I think there needs to be legislation that would prevent internet service providers from interfering with user access to the internet in anyway. They should only be service providers, not censors. They have the right to charge based on the speed/strength of connection (dial-up, broadband, cable,etc.) but otherwise consumers should have unrestricted access to all the content available. What I believe in is a level playing field for all users of the internet.

Kathleen Maher

As if you really need me telling you why we need net neutrality - the least you can realize is that even if you do side with Comcast and other media giants your work will soon be un-done by a new administration. So you might as well do right by the people of this country so we don't have to clean up any more pro-business messes. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Barbara Miluski

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. When you buy a book, is the person that provided it to you allowed to tell you how to read it? When you buy a sandwich, is the maker of said sandwich allowed to tell you how to eat it? Then why should an internet provider be allowed to tell you how to use it? If they feel it is that cumbersome, then they should stop their monopolies and let others run the internet.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. As a former Comcast customer of both their cable television and their internet service, I know first hand what we suffer if they are allowed to commit these crimes in the future. The economy would crumble because bills would not get paid, deals would not be closed, and jobs would be lost due to communications being blocked by, then, every internet provider who will follow Comcast's example of inhumane customer treatment. Put yourself in our shoes on a more personal level. Say you are on your last year of paying your mortgage and your mortgage company changes their online bill-pay service to some new, streamlined innovation that gets the bill payment done on the spot. That payment will not go through and you will get a delinquency because of it. That is what will happen to every American, from lower class on up, if this continues.

Please, if only for the sake of the economy, block Comcast from blocking us. Put an end to their imperialistic arrogance. Please.

Bruce Scherer

33 South Pennsylvania Ave.

Blackwood, NJ 08012

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. It is clear that the FCC can no longer wait and must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers or other individuals or groups to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. We live in a country with a long tradition of free speech and we should not allow ourselves to tolerate anything less for ourselves and future generations. Let us not allow anyone to limit our ability to seek information as we see fit. This is not the land of the former Soviet Union or present day China and we should not stand for this type of censorship! Our government has criticised these governments for this type of behavior in the past and continues to use them as examples of what this country is not. Now is the time to demonstrate this by sending a clear message to all who would attempt to do otherwise.

I am a comcast customer, and I am deeply concerned about their deceptive blocking of peer-to-peer communications on both democratic and professional grounds. This situation is what has led many, including myself, to favor strong and clear net neutrality provisions in media policy and law. Without such provisions, it is likely that the public interest in broadband communications will be severely compromised. I'd like to explain my situation to you a bit more to give you a sense of the vital importance of a formal and legally binding net neutrality policy. I use peer-to-peer software, as well as VPNs, to work from home. I worry that Comcast's actions will severely limit my productivity and make it difficult for me to earn a living. I know there a prevailing theory, among at least three of the FCC commissioners, that the invisible hand of the market is capable of addressing these issues. However, this is not the case. The market cannot help me and others like me because I have limited (if any) choice as a consumer. In my area, there is no other cable broadband provider. And, DSL services (the only other potential competition) are substandard to cable in terms of speed, making it difficult, if not impossible, for me to use the software I need for my career. However, if comcast blocks access or otherwise discriminates against the particular applications and content I wish to access, then I also will be at a severe loss. Furthermore, blocking access is not only inimical to my professional obligations, but also my civic responsibilities. I have become increasingly concerned as we continue to hear stories of not only Comcast, but other corporations such as Verizon and AT&T, blocking access and/or censoring content. With the dismal state of television news, I look to the internet to find the information I need to fulfill my duties as a citizen. Yet, without net neutrality, the utility of the internet is severely compromised. The FCC must take immediate action to end harmful discriminatory practices and prevent other Internet service providers from following Comcast's example of inhibiting the free flow of online information. Protecting net neutrality is supported by a long-standing legal tradition of protecting the public interest (as defined by democratic, not corporate, terms) and a flourishing marketplace of ideas. Furthermore, net neutrality protects First Amendment rights to speak and to hear. The Internet is an integral part of our economy and our civic lives. Corporate gatekeepers cannot be permitted to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

TRACY SIMONE

136 CRESTVIEW AVENUE
ABSECON, NJ 08201

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

In a democracy, all the people must be represented for the state to remain free; not only rich people. With your treachery, the United States has become a fascist plutocracy. It was your job to protect us. You have betrayed us. Stop taking the side of the rich over the poor or you will find YOU are the ones to lose your civil rights. The fascist plutocracy want everything and they value money more than human life. If you want to help, you can ban their outright lies, not our expressions of truth. Power does not rightfully belong to the fascist plutocracy. They stole it from the people when they bought it from you and other corrupt government officials like you. You, the FDA, the BATF, the ONDCP, you all sold us out and you most deserve to feel the brunt force of fascism that you have created in this country. Do not say we didn't warn you. Freedom of expression for all people; not just rich people.

Ridgewood, NJ 07450

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.
